

To whom it may concern

FOOD COMPLIANCE STATEMENT: EDIBLE FRESH COLLAGEN CASINGS

Fresh collagen casings are tubular artificial casings produced from collagen protein obtained from hides of bovine origin. These casings are edible and are typically used for the production of fresh (raw) meat products, but they can also be used to produce dry-fermented sausages.

Components	Percentage
Collagen	47 - 52%
Water	22 - 23%
Glycerine (food grade)	16 - 17%
Cellulose (food grade)	3 - 7%
Oil (food grade)	3 - 5%
Permitted colours (if any)	0 - 3%

The products listed in this document comply to the following food legislation:

- Recommendation labeling: Edible collagen casing.
- Fresh collagen casings are intended at being consumed together with the products they contain. They comply with European Regulation (EC) No. 853/2004 of the European Parliament as amended.

PRODUCT CODE	PRODUCT DESCRIPTION
