To whom it may concern

FOOD-CONTACT COMPLIANCE STATEMENT: FIBROUS CASINGS

Fibrous Casings are inedible and permeable fibrous casings for encasing ham and sausage. The types are:

V type: basic and versatile type of smoked and/or cooked ham and sausage

E, EX types: easy-peelable from the finished ham and/or sausage without disturbing the meat surface

G type: good-adhesion type and is used primarily for dry sausage where casing is needed to adhere to the product as it dries.

As suppliers of food contact materials, we hereby guarantee the subject material meets the requirements in accordance with the **Code of Federal Regulations, USA** as detailed below:

Basic chemical components of these casings in natural (clear) colour:

Component	Composition	Described as this may be safely used in
Regenerated cellulose	approx. 50W%	Section 177.1200, Title 21
Hemp paper (tissue paper made from Manila hemp)	approx. 20W%	Section 176.170, Title 21
Glycerin	approx. 22W%	Section 182.1320, Title 21
Moisture	approx. 8W%	

Treatment on inside of casing:

Treatment aid	Composition	Described as this may be safely used in
V type: None		
E type: Alkyl ketene dimers	Less than 0.4W%	Section 176.120, Title 21
G type: Polyamide-epichlorohydrin (water soluble thermosetting resin)	Less than 1.5W%	Section 176.170, Title 21
EX type: Chromium, Pentahydroxy(tetradecanoato)di-	Less than 0.1W%	Sections 176.180, 181.22, 181.30, Title 21

This compliance statement relates to the following products:
